I have had many students from Nonnewaug High School work for me over the years. The experience they get at an agri-science school is amazing. They learn the fundamentals of many agricultural businesses. As a business owner, this saves a lot of time training them when they start a job. My past students have moved on to orchards, botanical gardens, small farms, etc. I feel these programs being offered are essential to keeping agriculture alive in CT. I have been connected to agriculture my whole life and feel it would be a huge disservice to our youth to not fund these programs. Please support Bill# 5283

Thank you
Susan Lyle
